DI - Tables

Learning Objectives

- Types of Questions in Tables
- How to compare Tables and solve Qs
- Shortcuts & Tricks in Tables Questions
- Difference in Change & Percentage Change
- Application of Weighted average in Tables
- Some Actual paper Questions to understand the concepts

DIRECTIONS *for questions*: *Study the following table and answer the questions given below it.*

Number of student appeared and qualified in five subjects over the years										
Year	English		Maths		Geography		History		Science	
1981	196	84	250	35	160	42	140	30	150	40
1982	212	34	160	30	212	50	150	40	160	35
1983	160	40	180	45	115	35	210	60	170	45
1984	190	35	250	60	180	60	240	70	185	50
1985	200	47	300	140	200	70	260	80	190	55

1985	200	47	300	140	200	70	260	80	190	55

Q5. In which year the number of students qualified in History was two hundred percent of the number of students qualified in English in the same year?

1. 1981 2. 1982 3. 1983 4. 1984

(Cncp: Tables - Calc. & Approx.)

hitbullseye *Test Prep Simplified….*

DIRECTIONS *for questions:* *Answer these questions based on the tables given below.*

There are 6 refineries, 7 depots and 9 districts. The refineries are BB, BC, BD, BE, BF & BG. The depots are AA, AB, AC, AD, AE, AF, & AG. The districts are AAA, AAB, AAC, AAD, AAE, AAF, AAG, AAH, and AAI. Table A gives the cost of transporting one unit from refinery to depot. Table B gives the cost of transporting one unit from depot to a district.

hitbullseye *Test Prep Simplified….*

Refinery – Depot

Depot – Distt.

Class Exercise – I from PDF

DIRECTIONS *for questions*: An industry comprises firms A, B, C, and D. Fin details of firms and industry for a particular year are given. Profitability of a firm is defined as profit as a %age of sales.

Figures in Rs.	A	B	C	D	Total
Sales	24568	25468	23752	15782	89570
Operating costs	17198	19101	16151	10258	62708
Interest costs	2457	2292	2851	1578	9178
Profit	4913	4075	4750	3946	17684

hitbullseye *Test Prep Simplified….*

Figures in Rs.	A	B	C	D	Total
Sales	24568	25468	23752	15782	89570
Operating costs	17198	19101	16151	10258	62708
Interest costs	2457	2292	2851	1578	9178
Profit	4913	4075	4750	3946	17684

Q9. Which firm has the highest profitability?

1. A 2. B 3. C 4. D

(Cncp: Tables - Calc. & Approx.)

Figures in Rs.	A	B	C	D	Total
Sales	24568	25468	23752	15782	89570
Operating costs	17198	19101	16151	10258	62708
Interest costs	2457	2292	2851	1578	9178
Profit	4913	4075	4750	3946	17684

Q10. If firm A acquires Firm B, approx. what percentage of total market (sales) will they corner together?

1. 55% 2. 45% 3. 35% 4. 50%

(Cncp: Tables - Calc. & Approx.)

Class Exercise – II from PDF

DIRECTIONS *for questions*: PCB, Mathematics, Social Science, Vernacular and English. Each of the ten papers is evaluated out of 100. The final score of a student is calculated in the following manner. First, the Group Scores are obtained by averaging marks in the papers within the Group. The final score is the simple average of the Group Scores. The data for the top ten students are presented below. (Dipan's score in English Paper II has been intentionally removed in the table.)

	PCB Group			Mathe-matics Group	Social Science Group		Vernacular Group		English Group		
Name of the student	Phy.	Chem.	Bio.		Hist.	Geo.	Paper I	Paper II	Paper I	Paper II	Final Score
Ayesha(G)	98	96	97	98	95	93	94	96	96	98	96.2
Ram (B)	97	99	95	97	95	96	94	94	96	98	96.1
Dipan (B)	98	98	98	95	96	95	96	94	96	??	96.0
Sagnik(B)	97	98	99	96	96	98	94	97	92	94	95.9
Sanjiv (B)	95	96	97	98	97	96	92	93	95	96	95.7
Shreya (G)	96	89	85	100	97	98	94	95	96	95	95.5
Joseph (B)	90	94	98	100	94	97	90	92	94	95	95.0
Agni (B)	96	99	96	99	95	96	82	93	92	93	94.3
Pritam (B)	98	98	95	98	83	95	90	93	94	94	93.9
Tirna (G)	96	98	97	99	85	94	92	91	87	96	93.7

Note: B or G against the name of a student respectively indicates whether the student is a boy or a girl.

	PCB Group			Math e-matics Group	Social Science Group		Vernacular Group		English Group		
Name of the student	Phy.	Chem.	Bio.		Hist.	Geo.	Paper I	Paper II	Paper I	Paper II	Final Score
Joseph (B)	90	94	98	100	94	97	90	92	94	95	95.0
Agni (B)	96	99	96	99	95	96	82	93	92	93	94.3
Pritam (B)	98	98	95	98	83	95	90	93	94	94	93.9
Tirna (G)	96	98	97	99	85	94	92	91	87	96	93.7

Q14. Had Joseph, Agni, Pritam and Tirna each obtained Group Score of 100 in the Social Science Group, then who will have the best final score, out of these four people?

(Cncp: Tables - Weighted Average)

	PCB Group			Mathe-matics Group	Social Science Group		Vernacular Group		English Group		
Name of the student	Phy.	Chem.	Bio.		Hist.	Geo.	Paper I	Paper II	Paper I	Paper II	Final Score
Ayesha(G)	98	96	97	98	95	93	94	96	96	98	96.2
Ram (B)	97	99	95	97	95	96	94	94	96	98	96.1
Dipan (B)	98	98	98	95	96	95	96	94	96	??	96.0
Agni (B)	96	99	96	99	95	96	82	93	92	93	94.3
Pritam (B)	98	98	95	98	83	95	90	93	94	94	93.9

Q15. Each of the ten students was allowed to improve his/her score in exactly one paper of choice with the objective of maximizing his/her final score. Everyone scored 100 in the paper in which he or she chose to improve. After that, the topper among the ten students was:

1. Ram 2. Agni 3. Pritam 4. Ayesha 5. Dipan

DIRECTIONS *for questions*: The financial profile of a company is as given below:

(Rs. million)	Year ended 31st Mar 2001	Year ended 31st Mar 2000
Gross Revenue	187.1	147.8
Gross Profit	10.8	3.9
Profit after Tax	8.8	3.1
Equity Capital	7.5	7.5
Reserves	18.4	20.0
EPS (in Rs.)	117.33	41.33
Net Margin %	4.65	1.82

DIRECTIONS *for questions*: *Read the table and answer*

PRODUCTION OF COINS IN A STEEL PLANT FOR ONE WEEK

Days	No. of Coins produced	Daily Production Cost (Rs)
Monday	900	3000
Tuesday	1000	4000
Wednesday	900	5200
Thursday	1200	5000
Friday	1000	3200
Saturday	600	2000

Q17. On which day the production cost per coin was the highest?

1. Monday 2. Wednesday 3. Thursday 4. Friday

(Cncp: Tables - Calc. & Approx.)

Answer key

Q. no	Key	Q. no	Key
1.	4th Option	**11.**	2nd Option
2.	3rd Option	**12.**	1st Option
3.	3rd Option	**13.**	3rd Option
4.	2nd Option	**14.**	Pritam (96.1)
5.	4th Option	**15.**	5th Option
6.	2nd Option	**16.**	2nd Option
7.	4th Option	**17.**	2nd Option
8.	2nd Option	**18.**	1st Option
9.	4th Option	**19.**	3rd Option
10.	1st Option		

Explanation

1. By visualisation, for History there is a continuous increase in both the number of students appeared and qualified over the years.

2. For 1983 (English) the number of students was 40 of appeared was 160 i.e. 25%

3. Number of students appeared in 1981 in Maths = 250
Number of students appeared in 1985 in Maths = 300
% increase = (300 – 250)/250 × 100 = 20%

4. Required % = 40/160 × 100 = 25%

5. For 1984, the number of students qualified in history = 70
For 1984, the number of students qualified in English = 35
It satisfies the given criteria.

6. Least cost of sending one unit from refinery to any district is zero, this is done through BC- AC- AAC. Hence, answer is 2nd option.

7. Number of possible ways of sending one unit from any refinery to any district is $6 \times 7 \times 9 = 378$. Hence, answer is 4th option.

8. The largest cost of sending 1 unit from any refinery to any district is 1035.3 + 1157.7 = 2193.0 which is possible through BF – AE – AAH. Hence, answer is option 2.

9. A = 4913/24568 × 100 ≈ 20%
B = 4075/25468 × 100 ≈ 20% ↓
C = 4750/23752 × 100 ≈ 20%
D = 3946/15782 × 100 ≈ more than 25%.

10. Total sales = 24568 + 25468 = 50036
Reqd. % = 50036/89570 × 100 ≈ 55%

11. There are 5 cities which lie in between 10 E and 40 E. These are Vienna, Sofia, Tripoli, Warsaw, Lusaka. Out of these, only Lusaka lies in the Southern Hemisphere. Therefore answer is 20%.

12. Number of countries whose name starts with vowels and located in the southern hemisphere are 3. Number of countries, the name of whose capital cities starts with a vowel are 2. Therefore, answer is 3:2.

13. Dipan's average is 96. So, total is 480. His scores are

PCB	98 (Avg.)
Maths	95
Sst.	95.5
Verbal Group	95
Total	383.5

So, remaining 480 – 383.5 = 96.5. Therefore, total in English group = 96.5 × 2 = 193. Therefore, score in English(II) = 193 – 96 = 97

Hence, option 3 is the answer.

14. Calculating the average of all the students and find out their final score. So, answer is Pritam (96.1).

15. Increase the score to 100 for each student in the subject in which he or she has lowest marks. So, find out their new final scores, but in case of Dipan he would maximize the score in Maths as compared to Ayesha because it would increase his final score by 1 and hence will end up with highest final score to 97. So, option 5

16. Growth in revenue: 187.1 – 147.8 = 39.3, which is approx 27% of 147.8

Q17 to 19: Production cost per coin for all days

Monday = 3000/900 = 3.33

Tuesday = 4000/1000 = 4

Wednesday = 5200/900 = 5.77

Thursday = 5000/1200 = 4.16

Friday = 3200/1000 = 3.2

Saturday = 2000/600 = 3.33

17. Production cost per coin was highest on Wednesday, so option B is the answer.

18. For Monday and Saturday production cost per coin was same i.e. 3.33, so option A is the answer.

19. Average cost per coin for week = (3000 + 4000 + 5200 + 5000 + 3200 + 2000)/(900 +1000 + 900 +1200 +1000 + 600) = 22400/5600 = 4, hence option C is the answer.
